

Hands-on Infrastructure Automation with Terraform on AWS

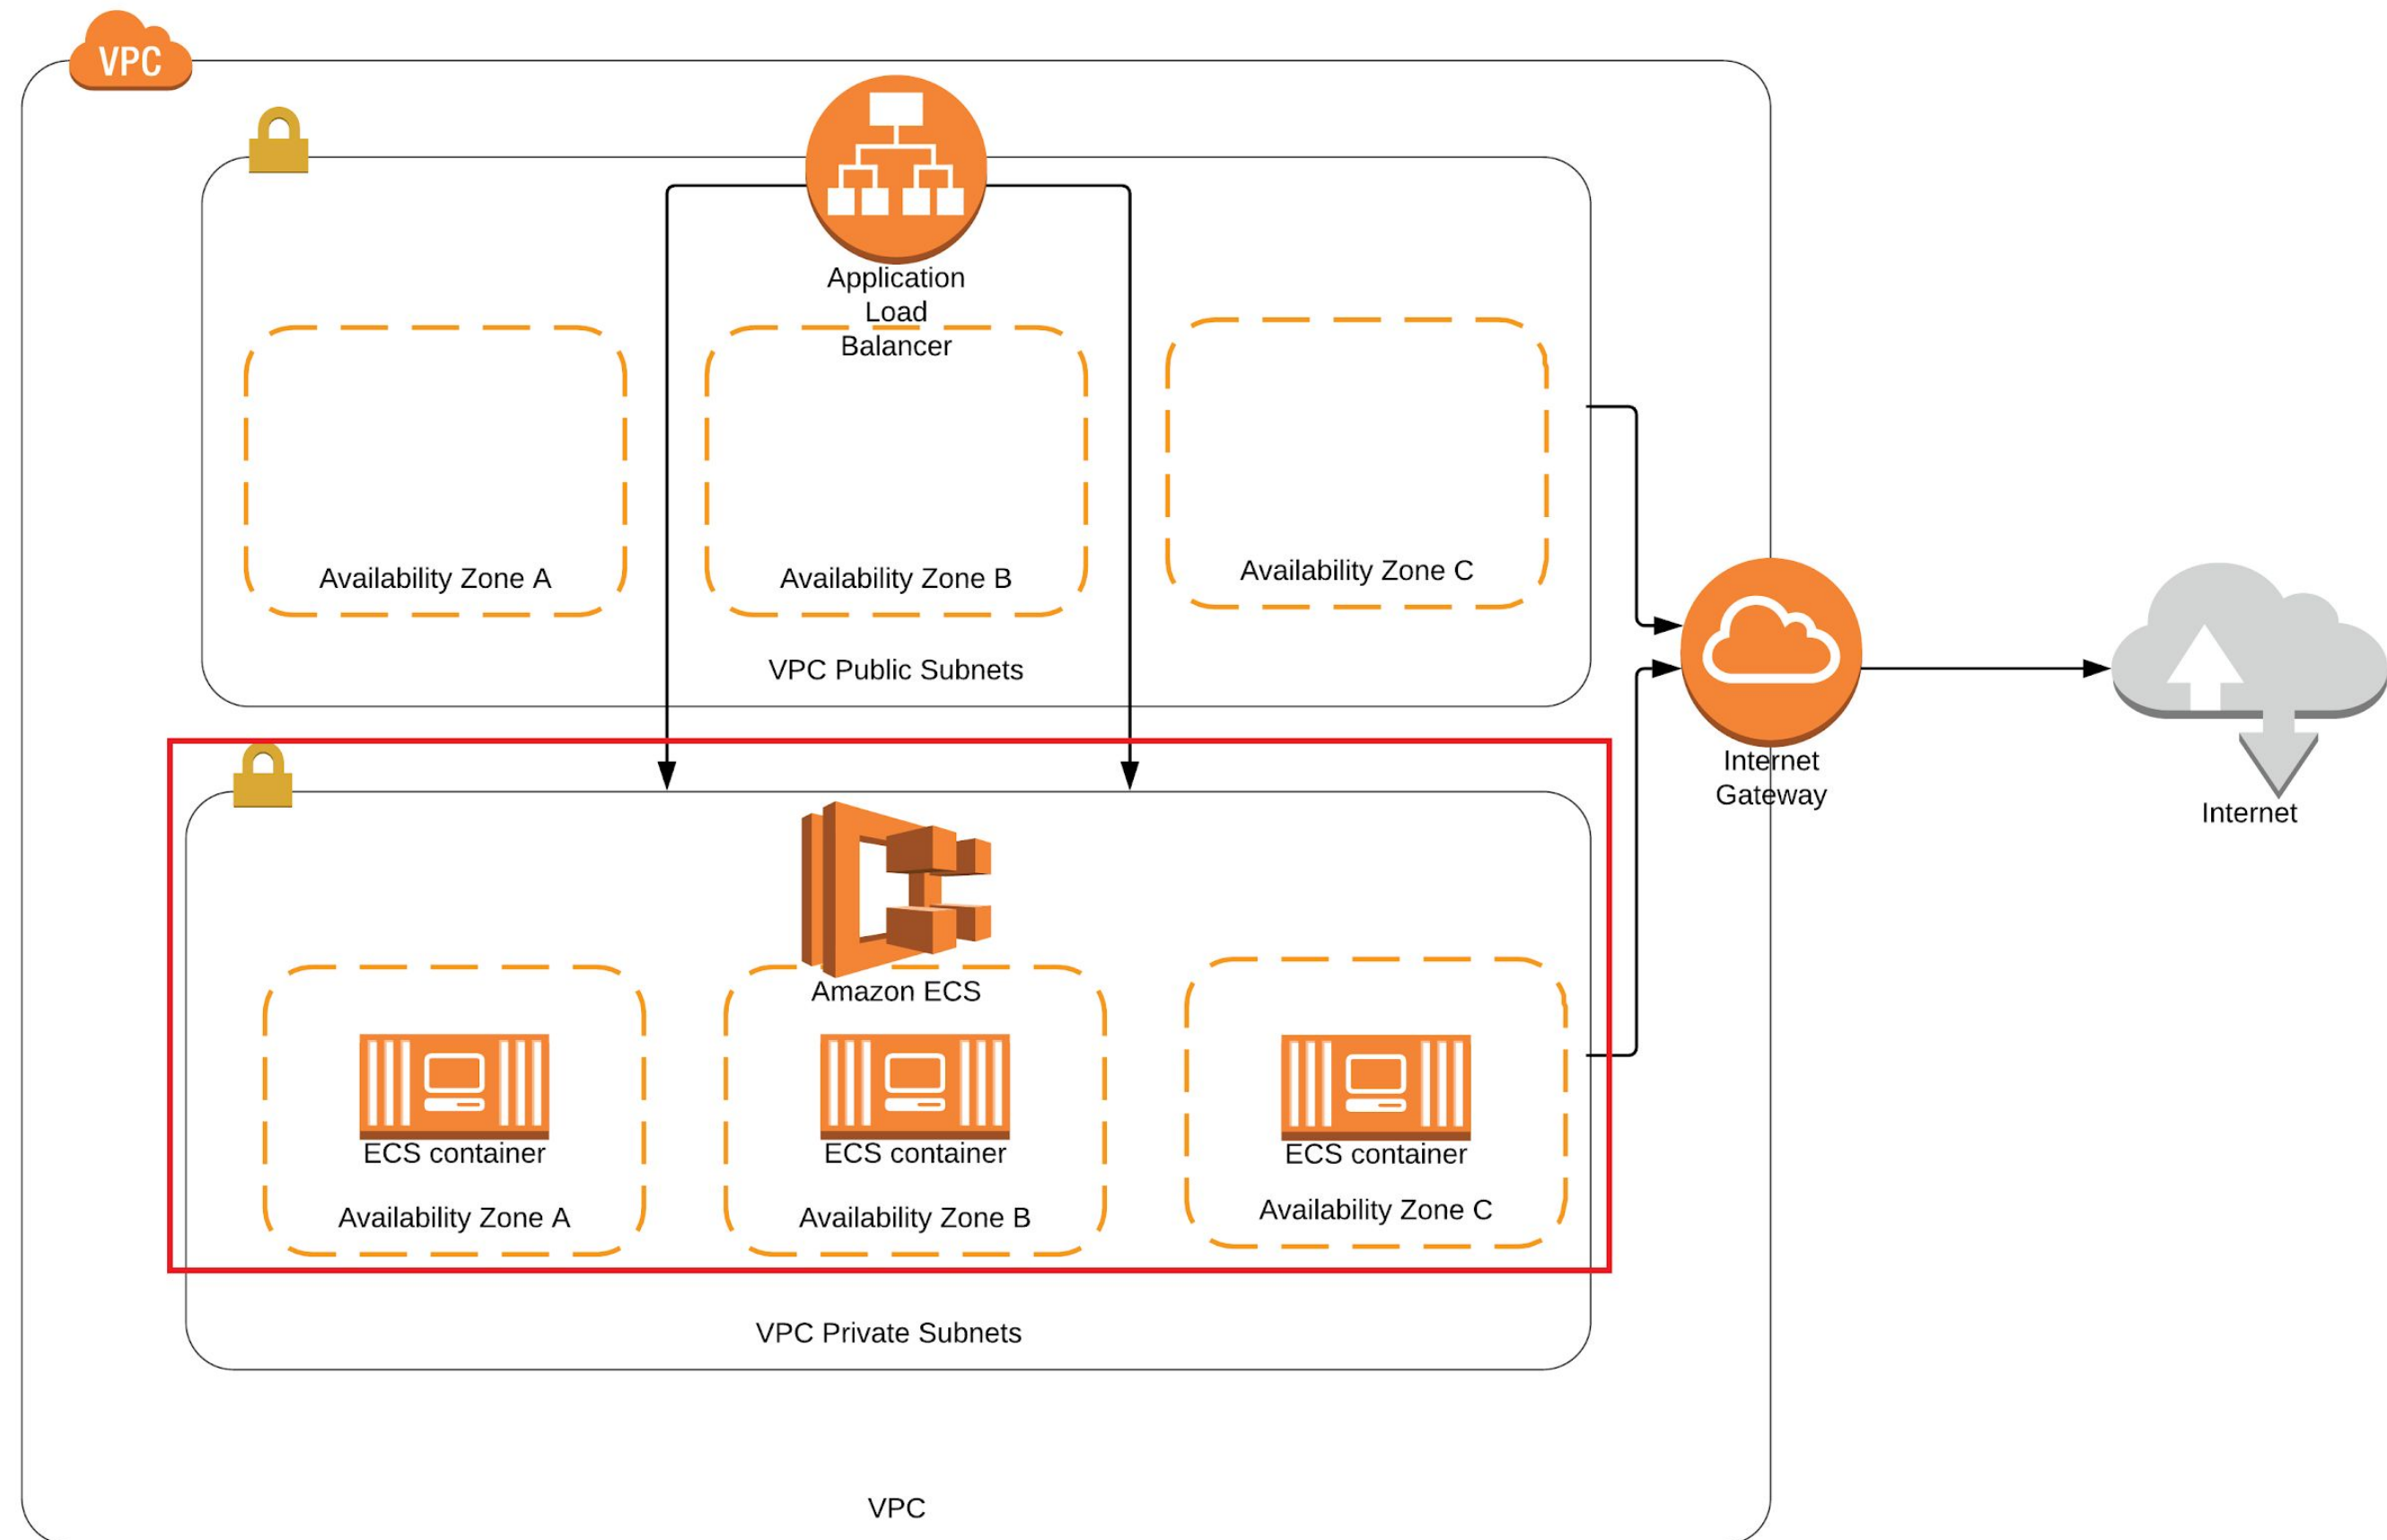

Alexander Savchuk

Building a multi-tier environment

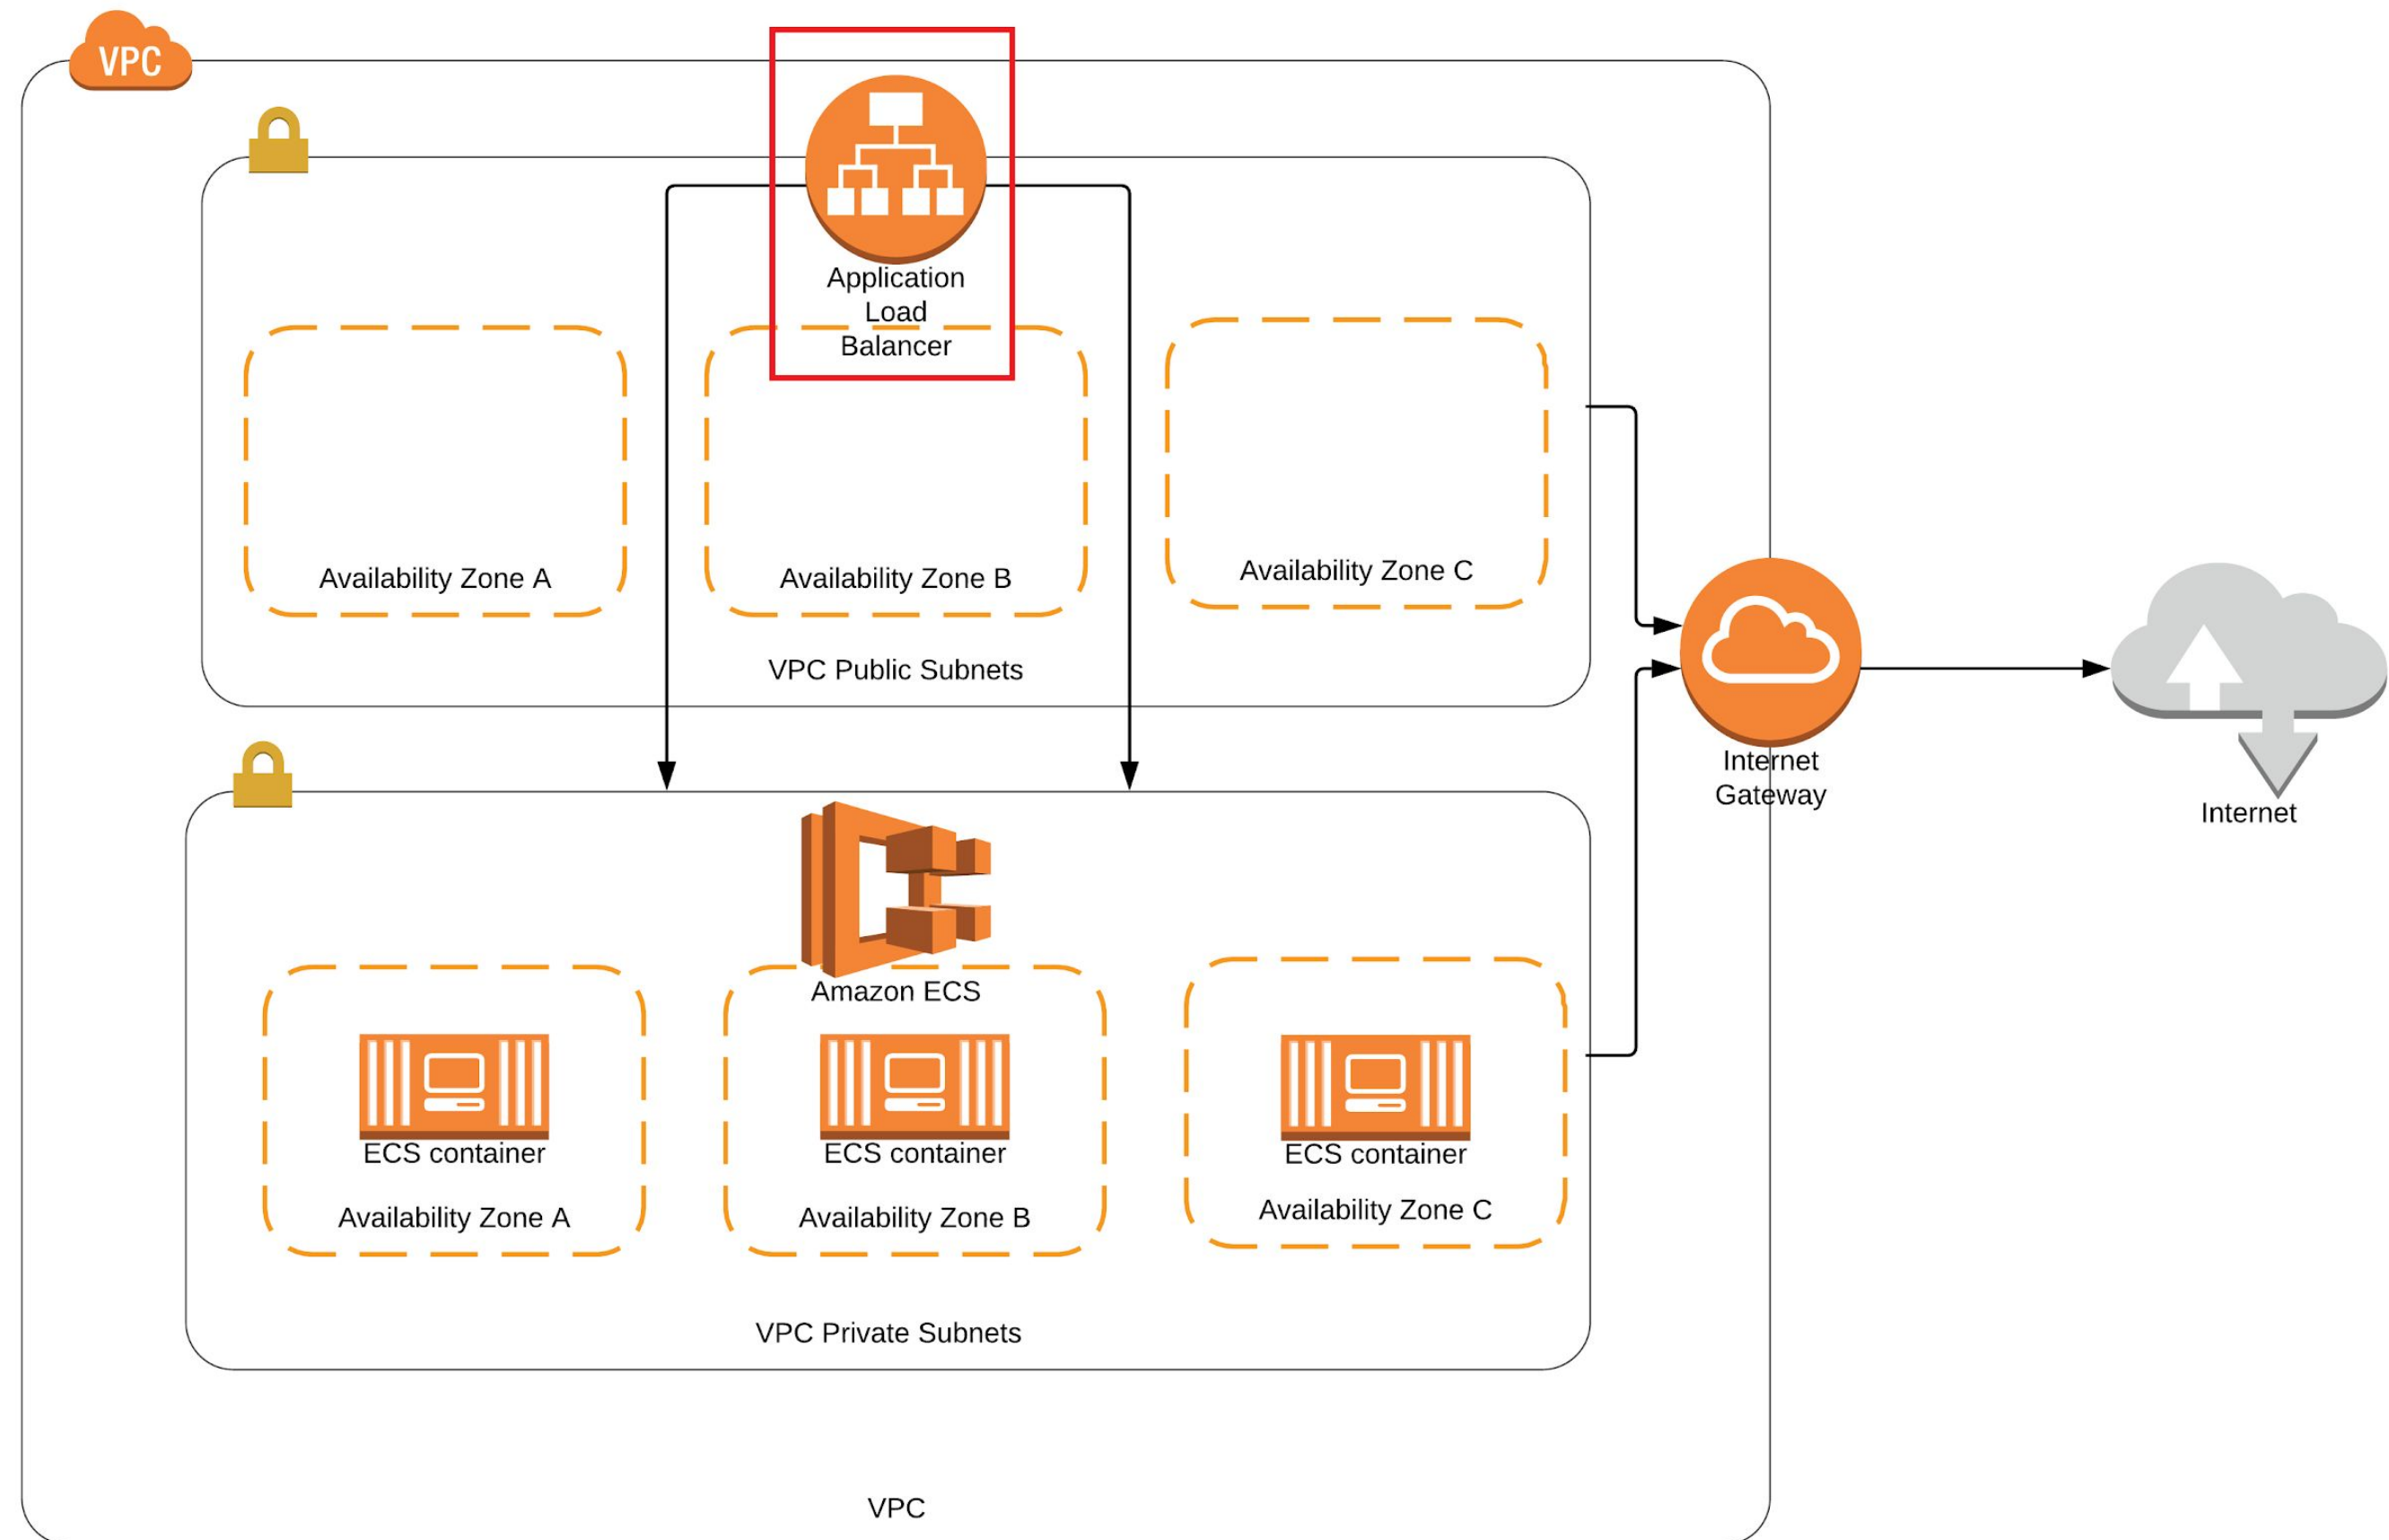

Section 4

Using templates

Application tier

Application tier

Learning objective

Use Terraform templates to compose complex string inputs.

Partitioning infrastructure

- If the resources are likely to be created and destroyed together, they belong together
- If some resource can be used by multiple other resources, it's better to keep it separate (VPC, RDS, ECS cluster)

Working with the dependency graph
